It's time to change the way we do research.

Mendeley is a free **reference manager** and **academic social network** that can help you organize your research, collaborate with others online, and discover the latest research.

- Automatically generate bibliographies
- Collaborate easily with other researchers online
- Easily import papers from other research software
- Find relevant papers based on what you're reading
- Access your papers from anywhere online
- Read papers on the go, with our new iPhone app
- View more features...

Quick and simple installation

Once you download the Mendeley reference manager, you can install the Word Plugin in 3 clicks. Hey presto – you are ready to create your bibliography.

Citation styles for thousands of journals

Quickly search and select your citation style from a rapidly growing **community managed database**, or create new styles with the new CSL Editor.

Create bibliographies instantly

Cite seamlessly without leaving Word. Format your citations and bibliography according to your chosen style.

Flexible formatting

Hanging indents, the use of "ibid.", author disambiguation. Mendeley looks after the details of creating a bibliography so you can focus on writing.

Collaborate on bibliographies

Share bibliographies with your colleagues through a private group. Any member can add or edit any cited references.

Read and annotate your PDFs

Save time navigating PDFs

Open multiple PDFs in separate tabs. Read, take notes and switch back to your research library instantly.

Annotate and highlight

No more need for hand-written notes, sticky notes and highlighter pens. You can now annotate, highlight, and add sticky notes directly to your PDFs.

Share annotations with others

Simply create a private group, add colleagues and start sharing. Every time you add notes or highlight a paper, it will be visible to members of the group.

Save and print annotations

All your annotations can be saved within your PDFs, so when you print them out, your ideas travel with you.

Export PDF with Annotations

Select content to export:

- Article content
- Notes

Content-based recommendations: The system recommends items similar to the ones preferred in the past.

Collaborative recommendations: The system recommends items that people with similar preferences liked in the past.

From papers to productivity in seconds

Organized PDFs
Organizing your PDFs doesn't have to be a chore. Let Mendeley do it for you. Identify recently added papers, add favorites in a click and store them in multiple folders.

Easily sorted
When you add PDFs, we instantly scan them to identify the author, title, journal and other information by matching the PDF's contents with our global research library. It's like magic.

Import from websites

The **web importer** allows you to import papers, web pages and other documents into your library from search engines and academic databases.

Drag and drop

Drag any PDF directly into Mendeley from your desktop or folders which you can then instantly annotate, cite, and highlight.

Import from existing software

Mendeley can import BibTeX, RIS and EndNote™ XML files so you can easily transfer your library from EndNote™, Papers and Zotero.

Automatically watch folders

Choose a folder on your computer to "watch". When you next add papers to that folder, they are also automatically added to your Mendeley library.

Next-generation DNA sequencing
Jae Shindure, Harles J in *Nature Biotechnology* (2008)
DNA sequence represents a single format into which a broad range of biological phenomena can be projected for high-throughput data collection. Over the past three years, massively parallel DNA sequencing platforms have become widely available. ...

Analysis of relative gene expression data using real-time quantitative PCR and the 2(-Delta Delta C(T)) Method.
K.J Livak, T.D Schmittgen in *Methods San Diego Calif* (2001)
The two most commonly used methods to analyze data from real-time, quantitative PCR experiments are absolute quantification and relative quantification. Absolute quantification determines the input copy number, usually by relating the PCR signal to ...
